OER Repositories

"Digital databases that house learning content, applications and tools such as texts, papers, videos, audio recordings, multimedia applications and social networking tools.

Through these repositories, [OER] are rendered accessible to learners and instructors on the World Wide Web (p. 1)."

McGreal (2012)

enc. ore +

European Network for Catalysing Open Resources in Education

The Ecosystem model

Low development of OER Institutional strategies

Fragmentation of the OER Community

Lack of interoperability among OER repositories

Selected quality aspects

- Author identification
- Transparent sources
- Review method
- OER quality criteria
- Legal information/licensing

Users choose their learning material based on whether they trust the quality of the material.

(see Allen & Seaman, 2014; Hilton, 2020; Zawacki-Richter et al., 2022).

(Ehlers & Kunze, 2021)

Only 43.6% of OER repositories mention explicit quality practices.

(Santos-Hermosa et al., 2017)

What information would this quality transparency tool need to contain to inform you about the quality of the OER?

What would you like to know, on the first glance, about the quality of a OER repository?

Let me know in the chat together with your profession/position!
