# CELT Recording Studio

The CELT recording studio has recently been fully refitted and refurbished. This state-of-the-art digital recording space is now taking bookings as a fully managed service.

On a studio project, CELT staff work with you throughout, from planning and scripting, through to facilitating your recording and managing any post-production requirements.

The Studio is located on the ground floor of the Arts Millennium Building.

and Tanya Ott-Fulmore<sup>3</sup> 

## Abstract

We have witnessed an increasing amount of science podcasts, and it has emerged as an important venue for science communication. From a strategic science communication perspective, this study investigated how science podcasters view science communication–related goals and objectives, as well as the tactics they use in producing science communication content based on the theory of planned behavior. A survey ( $N = 147$ ) with science podcasters showed that they see excitement and interest in science as their most prioritized objective and present the value of science over time. In addition, our results showed that podcasters frequently use communication tactics, but it may not have resulted from planned strategic communication action. The findings of this study provide initial insight into podcasters’ views and practice as part of the science communication effort.

- podcasters see the noninformational goal “valuing science” as the top priority... .. such as building trust with science communities.
- ““getting people interested or excited about science” more than “informing the public” as interim objectives,”

[Based on survey of N=147 science podcasters]

## The STEM Files

NUI Galway

A podcast from the NUI Galway College of Science and Engineering.

Conversations with our:

- research groundbreakers;
- undergraduate and postgraduate course directors;
- visiting speakers;
- civic and public engagement champions;
- industrial R&D partners and sponsors.

Whether you're a future student, colleague or supporter, or just plain interested in STEM, you're welcome! We'll cover everything, from Astrophysics to Zoology, and Civil Engineering to Pharmacology.
