Our understanding of cooperation

Our understanding of cooperation

Together with our local core partners and cooperation partners we want to achieve **sustainable change** to enable people to exert their rights to freedom of expression and access to information. Through our activities, we also strengthen the capacities of our partner organizations.

We base our strategies on a thorough analysis of the local **human rights** situation, paying special attention to **digital aspects**. Together with our partners, we identify the core problem, opportunities and risks. With a **holistic view**, we take into account socio-political, economic, and technological trends.

DW Akademie and its partners plan projects together and jointly define common project objectives – in a **strategic** and **results-oriented** manner. Implementation may be flexible with a view to best achieving the objectives. Both DW Akademie and its partners take on **joint accountability** to achieve project objectives.
