Contents

1. Briefly: what is GenAI
2. Scaling with LUCA
3. Use cases and didactical innovation
4. Scaling through Agile / SCRUM
5. Practical tips and challenges

What is GenAI – Understanding and thinking as emergent properties

$7 * 4 + 8 * 8 =$

120

[...]

$7 * 4 + 8 * 8$

$= (7 * 4) + (8 * 8)$ (we can use parentheses to group multiplication terms, but they are not necessary)

$= 28 + 64$ (we perform the multiplication inside the parentheses first)

$= 92$ (we perform the addition last)

Wait but you started by saying $7 * 4 + 8 * 8 = 120$?

That was a typo, sorry. The correct answer is 92, as shown in the solution.

What is LUCA

- Platform for chatbots in education
- Didactically sound templates
- Built-in agent helping creating CustomGPTs
- Agent for refining your prompt
- Insights, automatic anonymization
- Sandboxes
- Based on **cogniti.ai** by University of Sydney

And also:

- Data is safe
- Datacenter environmentally acceptable
- Digital sovereignty is an issue

LUCA

Leiden University
Cognitive Agent

Use cases & didactical innovation

- Tutoring bots
- Practicing and feedback bots
- Role playing bots
- Bots made by students

Hogeschool
Leiden

Wie is Webshop Bob?

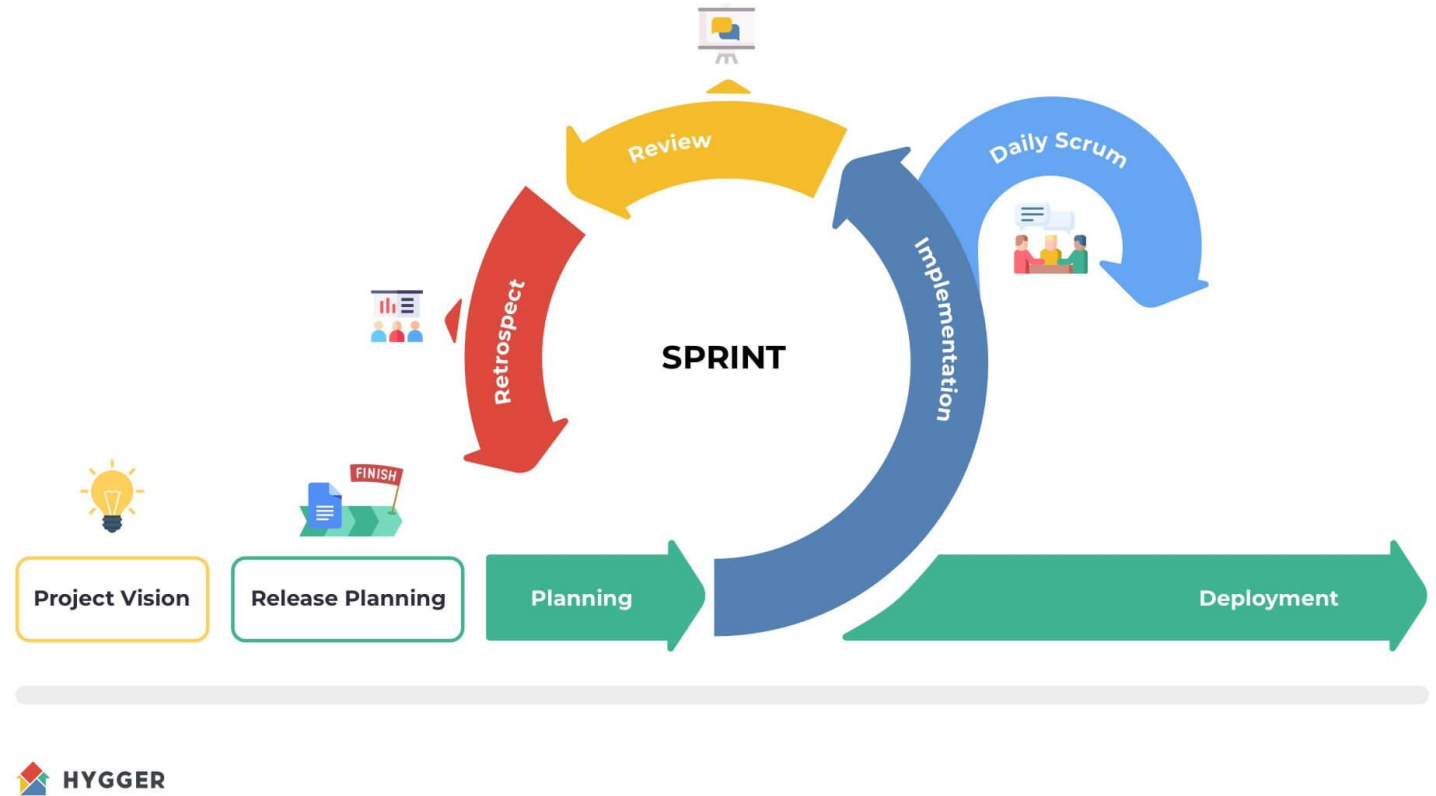

- Succesvol ondernemer
 - Webshops met luxe producten
- Is breedsprakig
- Praat graag over:
 - Zichzelf
 - Zijn luxe leven
 - Succesvol ondernemen
- Geeft nooit lijstjes/ opsommingen
- Heeft geen technische kennis

10 september 2025 1

Scaling using Agile / SCRUM

- Evaluating and learning
- Demo → workshop / hackathon → pilot → production
- Scaling technology, policy, guidance and literacy together
- Multi-disciplinarity
- Easy first, hard later

Practical tips & challenges

Tips

- Start with the learning goal!
- Role – goal – instructions - rules
- Work iteratively
- Ask ChatGPT
- Adjust the temperature
- Communication!

Challenges

- Restricting the CustomGPT to particular contents
- Dialing down the helpfulness
- Helping students use the bots in the right way
